A

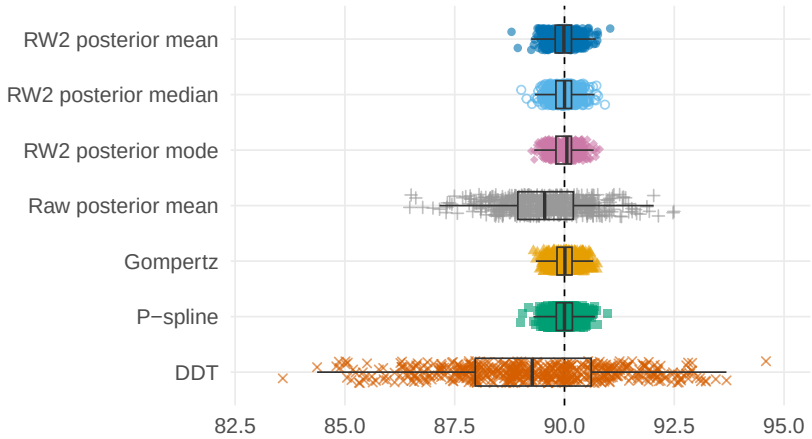

(a) Unimodal

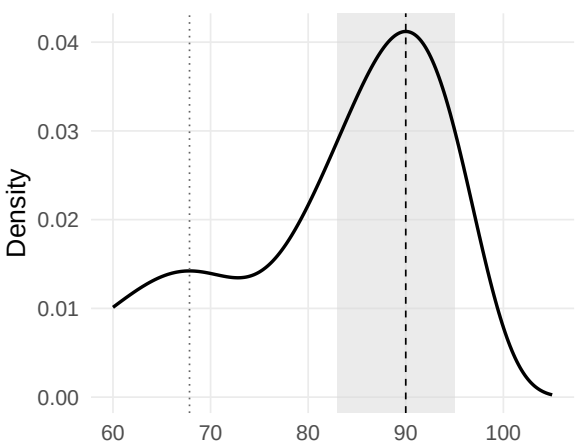

B

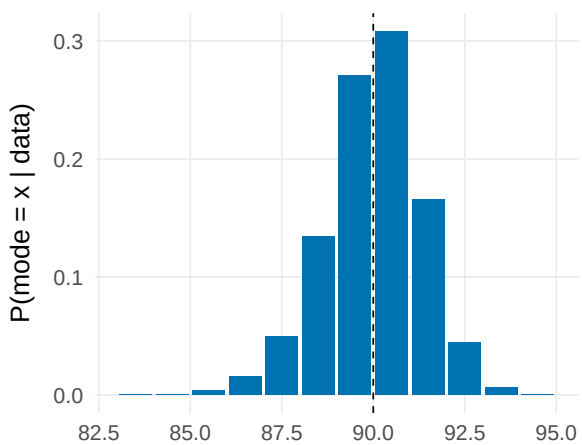

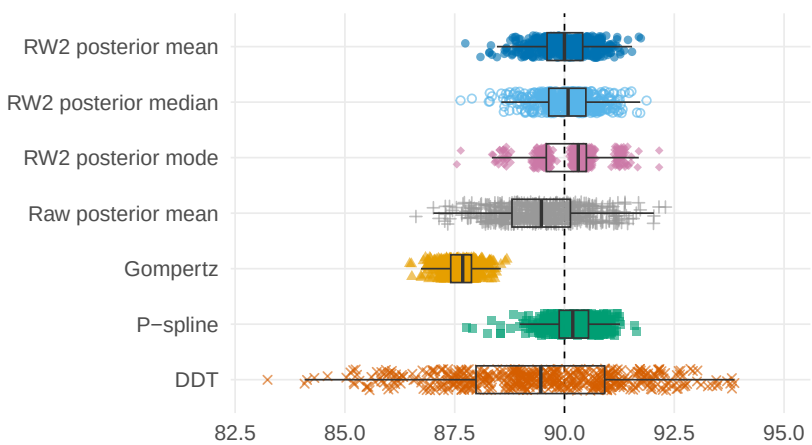

C

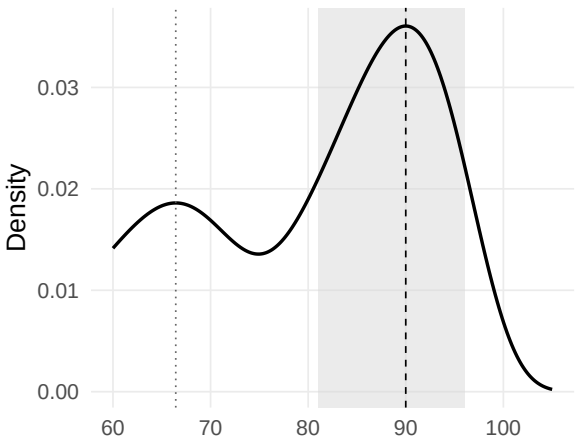

(b) 20% of deaths in the earlier component

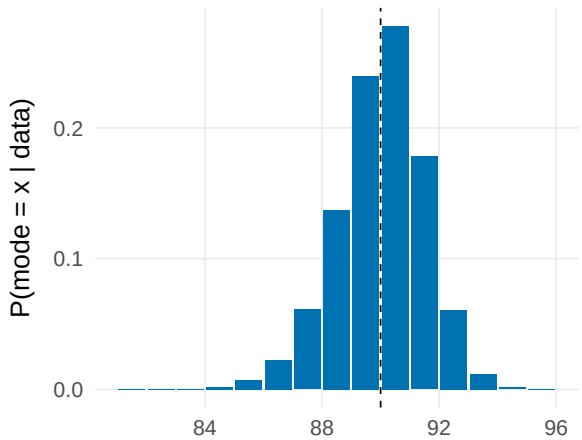

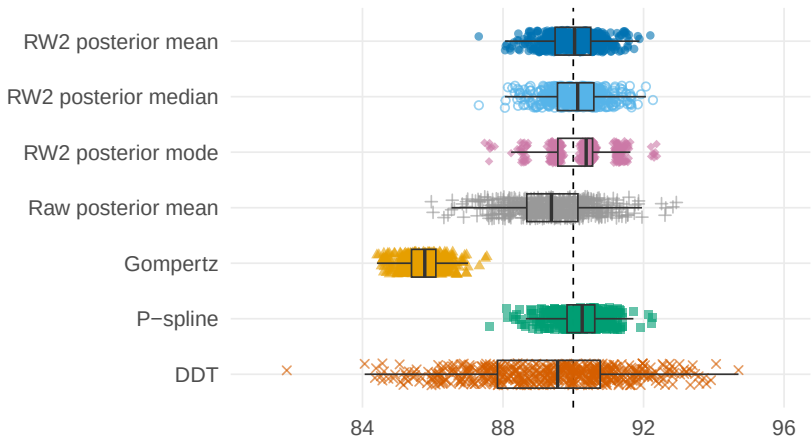

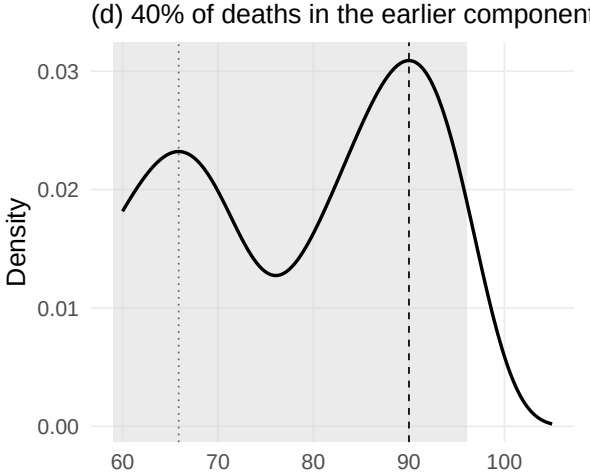

(c) 30% of deaths in the earlier component

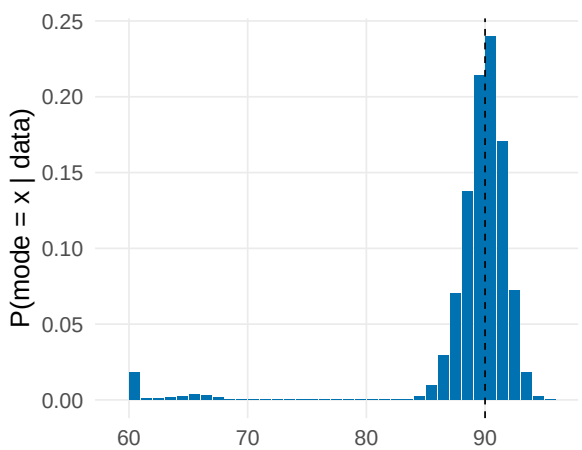

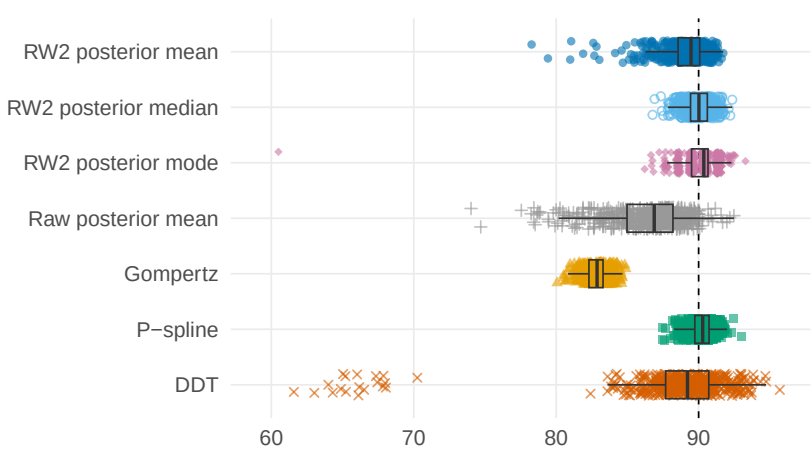

(d) 40% of deaths in the earlier component

N = 1,000, starting age 60. A: true density (shaded: ages shown in B and C). B: posterior of the mode, averaged over replications.
C: point estimates across replications. Dashed line: true (global) mode; dotted line in A: secondary peak. Age at death on the horizontal axes.
