A

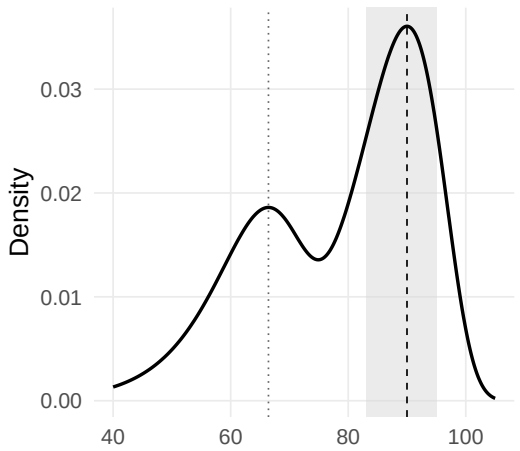

(a) Unimodal

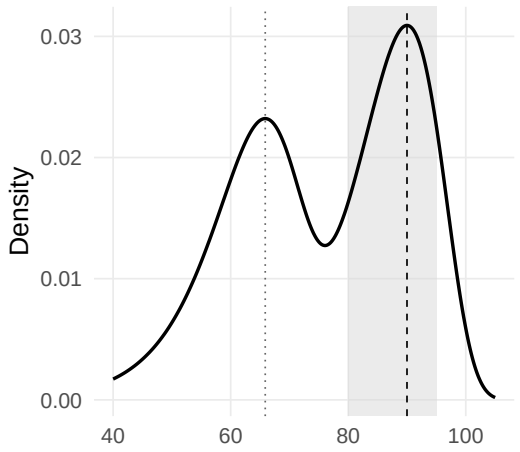

(b) 20% of deaths in the earlier component

(c) 30% of deaths in the earlier component

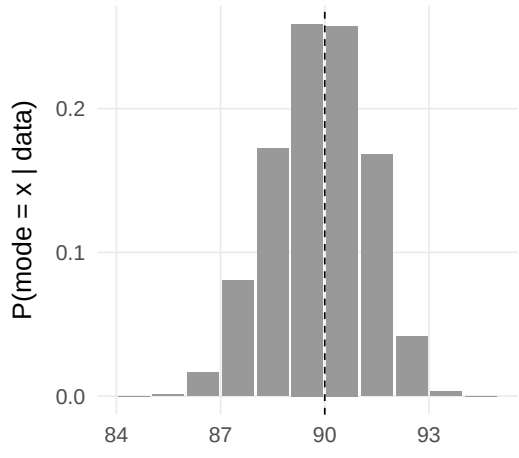

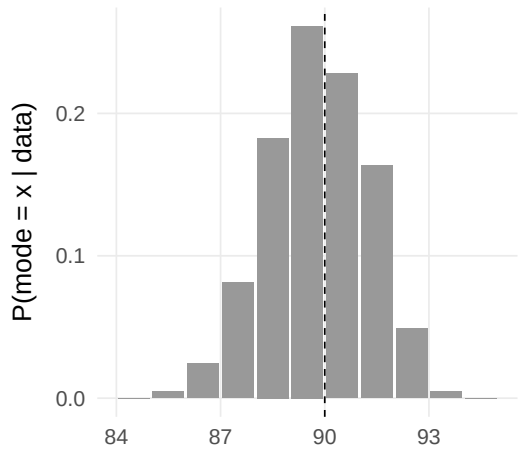

(d) 40% of deaths in the earlier component

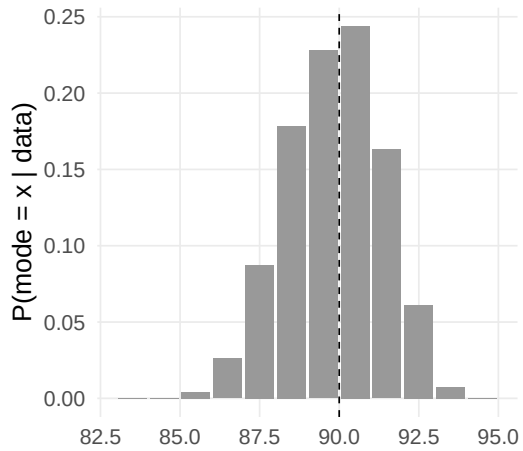

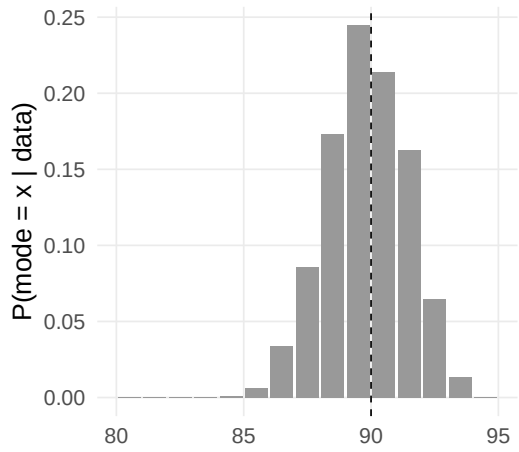

B

Raw posterior

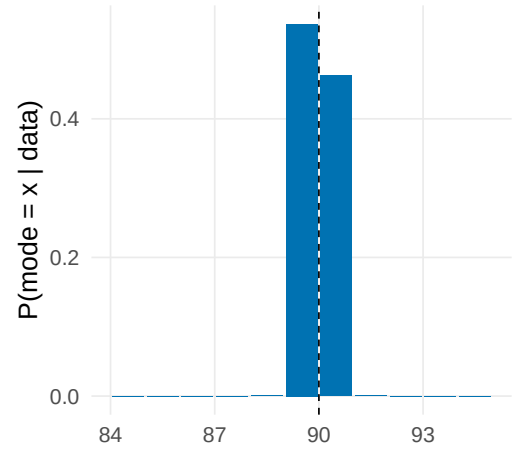

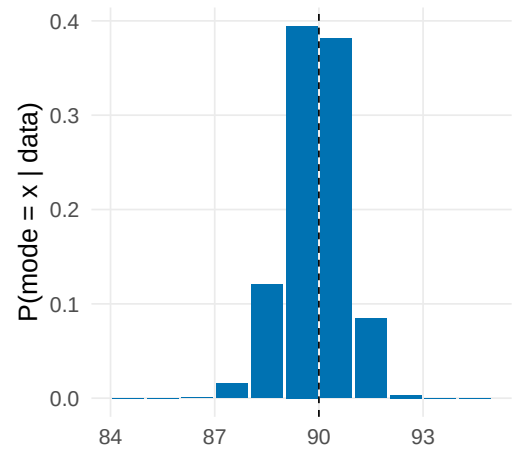

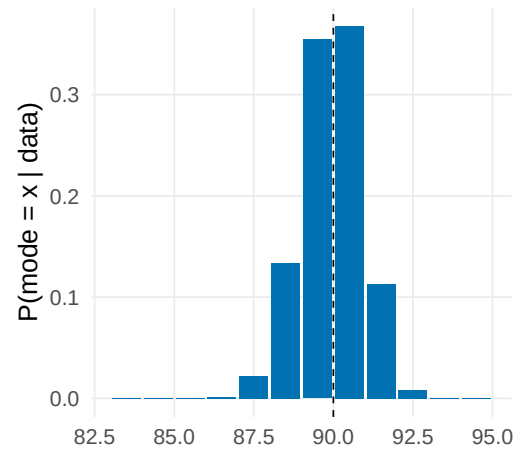

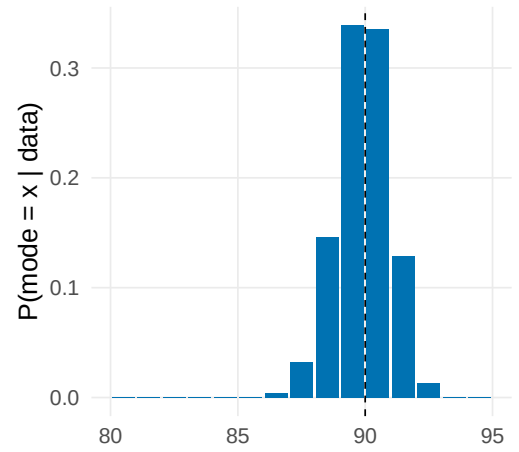

C

RW2 posterior

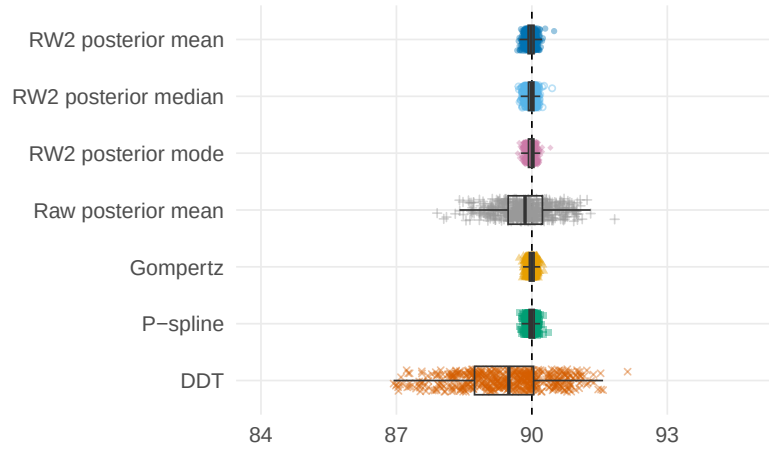

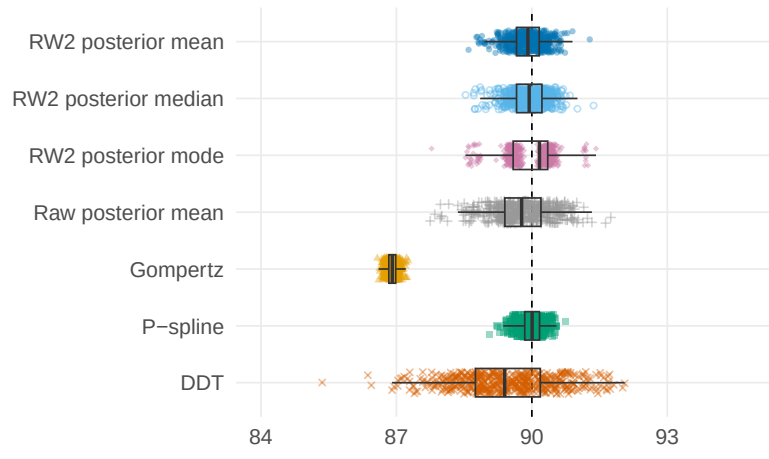

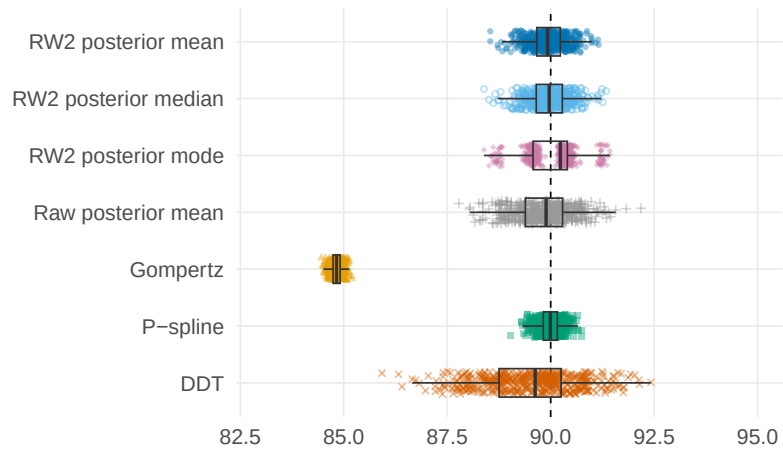

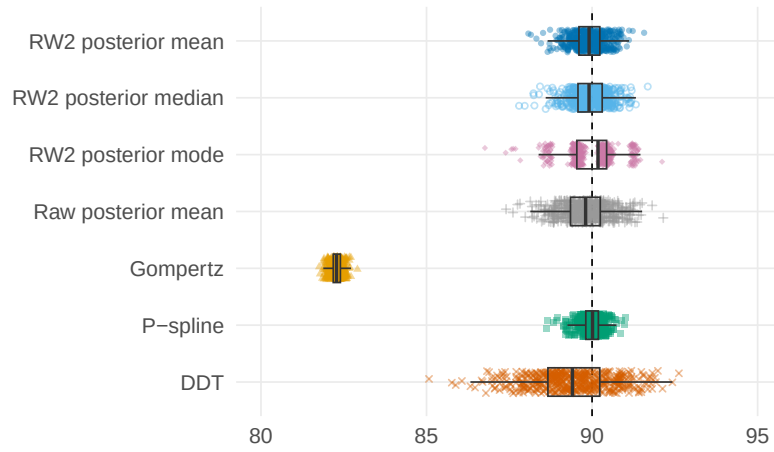

D

Point estimates

N = 10,000, starting age 40, 500 replications. A: true density (shaded: ages shown in B−D). B, C: posterior of the mode averaged over replications.
D: point estimates across replications. Dashed line: true mode; dotted line in A: secondary peak. Age at death on the horizontal axes.
